Collaborative software engineer with a strong ability to work on small dynamic teams, engage closely with customers, and thrive in interconnected, interdisciplinary environments.

TECHNICAL EXPERIENCE

Implementation Consultant | FAST Enterprises

Jun 2022 - Sep 2025

- Configured FTP protocols for secure file transfers, developing internal code to validate and process files, and crafted SQL queries for comprehensive reporting for a new property tax benefit.
- Converted 39 coding projects from VB.NET to C#, improving code maintainability and aligning with modern development standards.
- Revamped e-services website to improve usability and meet WCAG accessibility standards. Facilitated seamless API integration with existing payment vendors.
- Collaborated with government employees in the Office of Tax and Revenue to scope, document, and design functionality for 66 separate enhancements and new initiatives, ensuring alignment with business objectives, user needs, and site software.
- Developed comprehensive documentation for future developers and led Quality Assurance testing efforts through testing and regression scenarios.
- Educated college students on technology career opportunities, enhancing their industry awareness.

Student Ambassador Research Experience for Undergraduates | Boston University

Jun - Aug 2019

- Investigated the applications of both inviscid and viscous Burgers' equations in modeling virus inactivation processes. Synthesized findings into a comprehensive PowerPoint presentation, effectively sharing insights at the program's conclusion.
- Utilized python to create visual models of dispersion of a wave through a medium.
- Coordinated weekly check-in meetings with two ambassadors for a cohort of undergraduate students, fostering a supportive community and addressing student needs.

EDUCATION

Bachelor of Arts in Physics and Math
Boston University | Boston, MA
GPA 3.3

May 2022

OTHER WORK EXPERIENCE

Calculus I Learning Assistant | Boston University

Jan - May 2022

- Led weekly discussion sections and office hours to further the students' knowledge on mathematical problem-solving techniques.
- Monitored student progress and gathered feedback on comprehension throughout the course. Adapted teaching strategies, including pace and designing problem sets involving computational models and real-world applications to meet student needs.

Music Instructor | Immigrant Family Services Institute

Jun 2018 - Jun 2021

- Developed and implemented a comprehensive music curriculum, overseeing the program from start to finish. Assessed student knowledge and placed 40 students into ensembles based on skill and experience levels. Curated song selections for learning and incorporated student feedback to enhance the program, including adding rhythmic games to complement music theory lessons.
- Directed volunteers and other music teachers on effective strategies for supporting and instructing students in preparation for concerts.

SKILLS

Computer: C#, SQL, Python, Java, HTML, CSS

Languages: English (Native), French (Fluent), Haitian Kreyol (Basic)
